# CORROSION RESISTANT STAINLESS STEEL PRODUCTS

Rolled Alloys specialise in the manufacture of corrosion resistant stainless steel products, and construction materials for sulphate removal and desalination packages.

Mainly serving the oil, gas, desalination and marine handling industries, Rolled Alloys stock and distribute Zeron® 100 super duplex stainless steel pipes, fittings and flanges as individual components or as project managed pipework packages. They also fabricate Zeron 100 pipe spools, manifolds and cartridge filter vessels in accordance with client drawings and specifications.

Rolled Alloys have supplied manufacturers and engineering contractors building SWRO units which vary in capacity from 10 to 100,000 m<sup>3</sup>/day. The company also supplies Zeron 100 to valve and pump companies, as well as other equipment manufacturers, involved in energy recovery, and membrane cartridge construction.

The total installed capacity of Zeron 100 is in excess of 1,250,000 m<sup>3</sup>/day of high pressure feed piping for membrane seawater desalination.
